

- Space-saving, worldwide transport
- Reduced freight costs
- Compact construction
- Optimized design
- Quick and easy on-site installation

KURZ **EXPORT-SEPARATED** **STEEL PLATE SILOS**

One crane package, one silo.

The segments of the silos are piled into one another in order to save space.

Ladder, substructure and accessories form a separate package.

KURZ RANGE OF SERVICES

SILOS AND SILO INSTALLATIONS FOR:

- STONES AND EARTH/ RAW MATERIAL CONDITIONING
- CONCRETE
- DRY MORTAR AND PAINTS
- ASPHALT
- RELOADING AND TRANSHIPPING INSTALLATIONS
- FOODSTUFFS, CHEMICALS
- POWER PLANTS
- ENVIRONMENTAL ENGINEERING

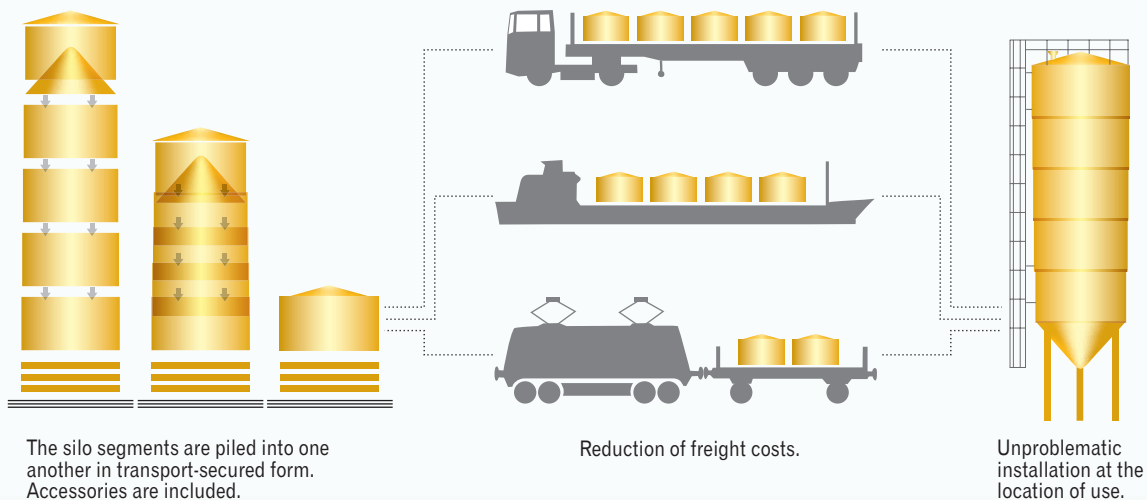

KURZ EXPORT-SEPARATED SILOS

SAVING COSTS WITH CLEVER LOGISTICS.

KURZ relies on freight-efficient separation for silos. This means that each silo shipping unit consists of no more than 2 crane packages and contains the complete silo including accessories such as the railing, ladder, locking tube, filler tube and dust removal filter. The segments of the silos are piled into one another in order to save space. Depending on the mode of shipment (lorry, train, ship), the silo packages are packaged in transport-secured form by means of vacuum sealing or in seaworthy boxes.

Export-separated silos not only have the cost advantage due to less expensive freight costs on their side. This special mode of shipment also ensures safe transport and prevents damage.

The silo components are screwed together at their place of destination. Connecting parts and sealing materials are included in the scope of delivery.
